

SCOTT BLODGETT

APPLIED AI • HEALTHCARE • REGULATED INDUSTRIES

Boston • scottblodgett@gmail.com • linkedin.com/in/blodgett • scottblodgett.com

Senior hands-on technologist who works directly with operators and domain experts to understand workflows, architect and build AI-enabled software, write code, integrate systems, evaluate AI behavior, and stay involved through production. Former CTO and entrepreneur with deep healthcare and regulated-environment experience.

Case Study – Jasper Health

PRODUCTION CLINICAL AI

Introduced generative AI at Jasper; three clinical applications to production and a fourth in development. Hands-on across architecture, DevOps, security, compliance, clinical, product, and engineering.

CLINICAL-AGENT EVALUATION

Grounding, hallucination, bias, protocol adherence, escalation, scope, and guardrails; test sets, production traces, automated scoring, error analysis, and LLM-based evaluation.

PATIENT-FACING AI GOVERNANCE

Led executive and HIPAA review of patient-facing controls: disclosure and agent identity, scope boundaries, safety triggers, hard-coded exits, and human escalation.

MODEL SUITABILITY

Reviewed training populations, benchmark results, and known limitations against intended healthcare populations and workflows before deployment.

Live Demos

- Voice AI - MakeCalls
- Agentic AI – “Sweetwater Ranch”
- Healthcare AI – Kintsugi

Proof points

- Embedded across dozens of companies, architectures, teams, engineering practices, and maturity levels as independent consultant.
- Co-founder, College Raptor sold to Citizens Bank 2022

Tooling

Build: Python • NextJS/TypeScript • PostgreSQL • Terraform
Cloud: AWS • Terraform Cloud
AI/LLM: Bedrock • Hugging Face • ElevenLabs • Langfuse • OpenRouter
• open-source & local models
Development: Cursor, GitHub Actions

RECENT EXPERIENCE (Independent since 2021)

CENTRAL SCOTT, LLC | Independent Technology Consultant | 2020-Present

Embedded across healthcare & PE-backed companies • AI • architecture • security • diligence

JASPER HEALTH | Fractional CTO / AI & Technology Lead | 2025-2026

Introduced generative AI • three clinical applications to production • fourth in development

OCP / VALTRUIS acquired by EVOLENT | Fractional CTO / Executive Advisor | 2022-2025

Value-based care • cloud • security • data • integration • analytics • post-acquisition continuity

EARLIER CAREER + EDUCATION / SERVICE

Earlier career: US Army (Major - Retired), software engineering, CTO/CIO, and global leadership across public, growth-stage, and startup companies.

Education: MS/BS Rochester Institute of Technology – Computer Eng. / Computer Science
